

Steel Aerosol Cans

With an annual production capacity of 2 billion cans, Evergreen Resources is a leading supplier of 3-piece steel aerosol cans globally. Our 5 state-of-the-art facilities are all ISO and DOT certified, ensuring the highest standards of quality and safety.

Key Benefits

Steel aerosol cans offer the perfect blend of durability, safety, and sustainability. Suitable for homecare, personal care, and industrial chemicals products, these cans provide superior protection for formulations while ensuring ease of use for consumers.

Infinitely Recyclable

Steel material can be 100% recycled repeatedly without losing quality

Durable & Lightweight

30% lighter today without compromising barrier and strength properties.

HD Vivid Printing

Advanced flat tinplate printing enables bright colors with no design restrictions

Can Shapes

Necked-In (NI) and Straight-Sided (SS). Whether your brand seeks the modern appeal of necked-in cans or the traditional look of straight-sided cans, Evergreen Resources is equipped to deliver the ideal packaging solution that reflects your brand's identity.

Necked-In

Necked-In (NI) cans feature a tapered top and bottom, providing a sleek and modern profile.

Straight-Sided

Straight-Sided (SS) cans maintain a uniform diameter throughout, offering a classic profile.

Specifications

Our portfolio features a wide range of can diameters, from 112 to 300. Can heights are adjustable to create many available sizes, providing you the flexibility to select the ideal can size for various product volumes, formulations, and retailer specifications.

Epoxy Phenolic, Epoxy Amino, and Unlined versions are available for all cans. Cans can be printed (litho) or unprinted (bright).

Can Size (US)	Can Size (mm)	Shape	Pressure	QTY/40'HQ
112 x 312	45 x 96	NI	2N, 2P, 2Q	295,680
112 x 410	45 x 118	NI	2N, 2P, 2Q	241,920
112 x 508	45 x 140	NI	2N, 2P, 2Q	201,600

Advanced Decorations

Evergreen offers 8-color advanced flat tinplate printing, delivering bright, vivid lithography without design restrictions. Our Computer-to-Plate (CTP) system ensures optimal transfer of graphics to tinplate, maximizing design quality.

We employ digital real-time monitoring to identify and balance color variations during production runs, minimizing fluctuations and maintaining consistent color quality.
